What is auto-LOAD and how does it work?

With auto-LOAD, the Würzburg Student Union offers an additional service that allows you to automatically recharge your chip card at a cafeteria or canteen checkout when your balance falls below a certain amount. You determine this minimum balance and the amount to be recharged yourself within a predefined range.

Thanks to auto-LOAD, you no longer need to worry about whether there's enough money on your chip card. All you have to do is grant the Würzburg Student Union a SEPA direct debit mandate for your current account so that the topped-up amounts can be debited from your account. Participation in auto-LOAD is voluntary.

Why auto-LOAD? Here's why:

- Charging is also possible without a top-up device.
- No more long queues at the top-up machine
- always have enough money on the card
- No balance check required
- shorter waiting times at the checkouts
- Safe. Easy. Eat!

Which maps are compatible with auto-LOAD?

Auto-LOAD is possible with any chip card issued by the student union or universities (student ID, employee, guest, or school card).

Where and how can I top up and use my card in the future?

studierendenwerk würzburg

rd are generall
k) food service
eveloped, auto-LOAD top-ups are
d Bamberg.

- Auto-LOAD top-ups work in conjunction with purchases at any Student Union checkout – specifically, the moment your personal minimum balance falls below your threshold. If you agree to the top-up during checkout, you will receive a receipt upon request. If you decline, your balance will remain unchanged.

- For security reasons, automatic top-ups at the checkout are only possible once a day.

When will the amount be debited from my account?

Your account will be debited within 4 days of topping up at a student services office.

What happens if I top up my account and it's not funded?

If you do not have sufficient funds in your checking account and a direct debit is returned, the payment function on your chip card will be blocked. If a direct debit is returned due to insufficient funds or incorrect bank details, a fee of €6 will be charged to you. Outstanding payments can be made at a service point of the student union or at the cash registers of the student restaurants. Your card will then be unblocked and fully functional again. Please do not transfer the amount again.

Is a cash revaluation still possible?

Participation in auto-LOAD is voluntary. You can, of course, continue to top up your card at the corresponding top-up machines with cash, a credit card, or a debit card. If you also choose to participate in the auto-LOAD program, you can switch between all these options as needed.

How can I register for auto-LOAD?

Registration is a one-time process and takes place at your local service point. Please bring your debit card and chip card with you. For SEPA direct debit, you will also need a valid official photo ID for identity verification and proof of address so that we can contact you in case of returned direct debits.

What do minimum balance and top-up amount mean?

- The **auto-LOAD minimum balance** is the amount of money below which you will be asked at checkout if you would like to top up your account. The **auto-LOAD minimum balance** is **€10** , but you can set a higher amount during registration.

- The **auto-LOAD top-up amount** is the sum that will be credited to your chip card as balance upon top-up and debited from your account via direct debit. Before the actual top-up, you will be asked at the checkout whether you agree to it. You also set this

amount yourself during registration. The **auto-LOAD top-up amount** can be **between €10** and **€50** .

Can I change the minimum balance and the top-up amount?

You can change the minimum balance and top-up amount at any time at the service points. Please bring your debit card and chip card with you.

When will auto-LOAD be available after registration?

The auto-LOAD procedure is activated at the cash registers in the catering industry no later than the following working day after initial registration (SEPA direct debit mandate).

Can international students use auto-LOAD?

Since auto-LOAD is based on the European SEPA direct debit scheme, account holders from credit institutions in 34 countries (SEPA area) can currently participate in the auto-LOAD process. The only requirement is proof of a valid residential address in Germany.

What to do if you lose your card.

- If you lose your chip card, you can have it blocked at the Student Union's service point by providing your bank details. It's best to bring your debit card (Girocard/EC card) with you. Participation in the auto-LOAD procedure is not possible with a blocked chip card until the block is lifted. If you find your chip card or receive a new one, you must contact the service point again.
- However, if you have lost your debit card/EC card, you should contact your bank immediately.

Where and how can I unsubscribe?

You decide whether and for how long you want to use the auto-LOAD procedure. You can revoke your participation in the auto-LOAD procedure at any time at the student services office's service points.

How can I receive my chip card balance?

- Your card balance will only be refunded after a waiting period of approximately two weeks. The quickest way is therefore to use up all the available credit on the card. If you still wish to have your balance paid out, for example because the card is defective, you must fill out the refund form and submit it to a service point of the

student union. The balance will then be transferred to your bank account.
- Please note that refunds are not possible for lost cards.

What happens to my data?

The Würzburg Student Union does not store any data such as name, date of birth, or address on the chip card. The card's digital wallet is not personalized. Only the data from the direct debit authorization, required for the top-up process, is linked to the chip card. The Würzburg Student Union does not electronically collect any further data. The General Data Protection Regulation (GDPR) is observed. You will be informed about this during the registration process.
